bluesign®

Be a part of the sustainable movement.

Get involved in environmentally friendly and safe textile production.

Bluesign is a globally operating company with its headquarters in St. Gallen, Switzerland. We offer solutions for textile and related industries to produce safe and environmentally friendly products. Our customers include major international brands, chemical suppliers, and textile manufacturers. Our employees are motivated professionals, focused specialists – and you!

To strengthen our team in St. Gallen, Switzerland or Augsburg, Germany we are looking for a:

Chemical Company Assessor (f/m)

Job Description

As a Bluesign Chemical Process Expert, you will have the unique opportunity to improve sustainability in the world of textiles, fashion, and apparel. You evaluate and assist chemical companies around the world along their sustainability journey.

The journey for an organization begins with a company assessment regarding environmental and occupational health and the organization's product stewardship management. Detail orientation and analytical skills play a key for a comprehensive evaluation and gap analysis following the bluesign® CRITERIA requirements. Through the findings of the gap analysis, you will work together with the organization's management teams in the development of a roadmap. The focus is in reducing negative environmental impacts and increasing resource productivity through the implementation of Best Available Techniques to ensure the organization closes its gaps and reaches its sustainability goals.

You will be a key player in nurturing customer relationships throughout a system partner's experience.

Major Responsibilities

- Conduct environmental/OH&S and product stewardship assessments in chemical companies
- Identify risk areas or regulatory compliance issues
- Prepare detailed evaluation and assessment reports in English
- Draft and present findings including company rating to management teams
- Create roadmaps and action plans with management teams with the goals of improving efficiency and reducing organizations negative environmental impacts
- Consult on roadmap implementation and provide formal performance and feedback evaluations

Qualifications

- Educational background in Chemistry/Chemical Engineering or related science
- Professional experience in relevant chemical industries
- Technical experience in the field of environment, occupational health and consumer safety
- Technical experience in product stewardship, classification, and labelling of chemical products
- In depth knowledge of the chemical supply chain
- Auditing experience (ISO 9001, ISO 14001, OSHAS 18001) as an advantage
- Willingness to travel (30 – 40%)

Personal Skills

- Conscientious and open minded
- Enjoys working in an international and intercultural environment
- Team player with proven ability to work independently
- Well organized with finely tuned analytical skills
- Ability to exercise good judgement
- Ability to offer knowledgeable advice to management teams
- Good command of written and verbal communication in English; German as an advantage

What's in it for you

- International travel and contacts to a vast variety of organizations
- Role with key responsibilities in a dynamic and global workplace environment
- Great benefits and flexible working hours
- Be a part of an internationally driven organization with a purpose that will broaden your horizon

Interested? Send us your application and corresponding documents, your earliest possible start date, and your salary expectations by applying through the following link: <https://smrtr.io/3WJJW>

We look forward to getting to know you.
