bluesign®

Be part of the sustainability movement.

Get involved in environmentally friendly and safe textile production.

Bluesign is a globally operating company with headquarters in St. Gallen, Switzerland. We offer solutions for textile and related industries to produce safe and environmentally friendly products. Our customers include major international brands, chemical suppliers, and textile manufacturers. Our employees are motivated professionals, focused specialists – and you!

To meet the increasing demand of the industry and to strengthen our team in South Korea, we are looking for a:

Textile Chemical Engineer (Seoul, South Korea)

Job Description

As a Bluesign Chemical Process Expert, you have a unique opportunity to improve sustainability in the world of textiles, fashion and apparel. You evaluate and assist chemical and textile companies in Korea along their sustainability journey.

The journey of an organization begins with a company assessment of environmental and occupational health and the organization's product stewardship management. Detailed orientation and analytical skills are essential for a comprehensive evaluation and gap analysis according to the bluesign® CRITERIA requirements. Based on the findings of the gap analysis, you work together with the organization's management team to develop a roadmap. The focus is on reducing negative environmental impacts and increasing resource productivity through the implementation of Best Available Techniques, to ensure the organization closes its gaps and reaches its sustainability goals.

You are a key player in nurturing customer relationships throughout a system partner's experience.

Major Responsibilities

- Conduct environmental/OH&S and product stewardship assessments
- Identify risk areas or regulatory compliance issues
- Prepare detailed evaluation and assessment reports in English
- Draft and present findings, including company ratings, to management teams
- Create roadmaps and action plans with management teams with the goal of improving efficiency and reducing the organization's negative environmental impacts
- Consult on roadmap implementation and provide formal performance and feedback evaluations

Interested? Send us your application and corresponding documents, your earliest possible start date, and your salary expectations via email to Ms. Irma Del Vecchio, HR, at: recruitment@bluesign.com

We look forward to getting to know you.

Qualifications

- Educational background in chemistry, chemical engineering or a related field
- Professional experience in textile chemicals or relevant chemical industries
- Technical experience in the field of environment, occupational health and consumer safety
- Technical experience in product stewardship, classification, and labelling of chemical products
- In-depth knowledge of the textile supply chain
- Good command of written and verbal communications in both English and Korean language
- Auditing experience (ISO 9001, ISO 14001, OSHAS 18001) is an advantage
- Willingness to travel

Personal Skills

- Good communication skills, including customer communications
- Conscientious and open minded
- Enjoys working in an international and intercultural environment
- Team player with proven ability to work independently
- Well organized with finely tuned analytical skills
- Ability to exercise good judgement
- Ability to offer knowledgeable advice to management teams

What's in it for you

- Regional travel and contact with a vast variety of organizations
- Role with key responsibilities in a dynamic and global workplace environment
- Great benefits and flexible working hours
- Be a part of an internationally driven and purposeful organization that broadens your horizon
